Hyderabad, India

PROFILE

Full-stack engineer who has taken two production systems from **architecture to real users**: a **multi-branch diagnostics CRM with automated WhatsApp report delivery**, and a **Quran academy management platform** now serving live operations. Core stack is Next.js, TypeScript, NestJS, PostgreSQL, and MongoDB, backed by hands-on experience with Docker-based VPS deployment, queue-driven background processing (Redis/BullMQ), and third-party integrations including WhatsApp Business Cloud API and cloud storage. Known for owning systems end to end, from schema design through production rollout, without needing hand-holding on ambiguous requirements.

Professional Experience

Software Developer, Zenoids Technologies

04/2026

- Technical lead and architect for CheckLife CRM, a multi-branch diagnostics center CRM with WhatsApp-based report delivery, now live in production with **real clinic staff and patients using it daily**
- Built the backend for ISMS, a Quran academy management platform (Admin/Teacher/Parent dashboards) covering attendance, exams, Hifz tracking, and automated PDF report generation
- Designed 8+ APIs for a financial consulting platform
- Optimized media management by connecting cloud APIs, **reducing server overload by 60%**

Hyderabad, India

Software Development Intern, Shariah Equities

06/2025 – 09/2025

- Designed **5+** API gateways to fetch filtered data from the database
- Helped in **maintaining** frontend and designing API calls

Hyderabad, India

EDUCATION

Bachelor of Engineering, Matrusri Engineering College

2021 – 2025

Computer Science and Engineering

Hyderabad, India

Courses

Full Stack Development, Code For India Foundation

10/2025 – 03/2026

Developed multiple end-to-end web applications such as:

- **Farmhouse Booking platform**
- **Finance Management & Subscription Reminder system**
- Implementing secure authentication, REST APIs, and database integration.

Hyderabad, India

PROJECTS

ISMS - Islamic School Management System , <i>Quran Academy Management System</i>	08/2026 – Present
• Built the backend for a multi-role academy platform (Admin, Teacher, Parent dashboards) covering students, batches, attendance, exams, Hifz tracking, homework, and leave management • Designed the PostgreSQL schema and NestJS/TypeScript API layer, with Redis and BullMQ powering an async report-generation queue for scalable PDF generation via Puppeteer • Deployed and maintained on company-owned VPS with Dockerized PostgreSQL, JWT authentication, and Nginx reverse proxy • Coordinated directly with a separate frontend team to finalize API contracts ahead of integration	
CheckLife CRM , <i>Multi-Branch Diagnostics CRM & WhatsApp Report Delivery</i>	06/2026 – Present
• Architected and led development of a production CRM now deployed and actively used by real staff and patients across multiple branches • Built a dynamic doctor approval chain for report sign-off, then automated delivery to patients via WhatsApp Business Cloud API, eliminating a fully manual process • Built on Next.js (App Router), Prisma 7, and PostgreSQL, with Cloudflare R2 for PDF storage and Resend for email notifications • Deployed and maintained on company-owned VPS infrastructure with Docker and Nginx, handling ongoing uptime and updates post-launch • Designed a vibrant, WhatsApp-inspired UI to keep the product intuitive for non-technical clinic staff, driving fast adoption	
Farmhouse booking platform  , <i>Farmhouse Discovery & Lead Marketplace</i>	03/2026
• Built a role-based REST API with 30+ endpoints covering vendor listing management, customer inquiry flow, and admin moderation • Implemented JWT auth with access/refresh token rotation, HTTP-only cookies, and instant session revocation across all devices • Designed MongoDB schemas using Mongoose, with compound indexes and TTL-based cleanup for query performance • Engineered Cloudinary image pipeline with signed uploads, on-the-fly transformations, and async email notifications via Nodemailer • Configured production deployment on VPS with Nginx reverse proxy, PM2 process management, and graceful shutdown	

SKILLS

Front-end

- React
- Next.js
- TypeScript
- Tailwind CSS

ORMs & ODMs

- Prisma
- Drizzle ORM
- Mongoose

Miscellaneous

- Data Structures and Algorithms
- Git, GitHub, Postman
- JavaScript, C++, Python

Backend

- Node.js, Express.js
- NestJS
- RESTful APIs
- JWT Authentication
- Redis, BullMQ

Integrations

- WhatsApp Business Cloud API
- Resend
- AI APIs (Anthropic Claude, OpenAI)

Databases

- PostgreSQL
- MongoDB

DevOps & Infrastructure

- Docker
- Nginx
- PM2, VPS Deployment
- Cloudflare R2
- Cloudinary

ORGANISATIONS

WithYou Organisation, *Student member and Observer*

01/2021 – Present

Part of the organising committee of donation drives such as blood donation, book donation and blanket donation.

Computer Society of India, *Student member*

02/2023 – 07/2025
Hyderabad, India
